

NY Killzone · FVG Retracement

Concept

First hour of NY (07:00-10:00 NY) often delivers a clean impulse that leaves an unfilled 3-candle FVG. Price tends to revisit that gap before continuing — we enter on the retrace into the gap midpoint.

Rules

- Session — NY killzone (07:00-10:00 NY).
- FVG — Newest bullish/bearish FVG formed in the last 8 bars on 15m.
- Retrace — Latest bar pulled into the FVG zone (low or high inside the gap).

Entry

- Limit at FVG midpoint.

Stop loss

- $0.5 \times \text{ATR}$ beyond the gap's far edge.

Take profit

- TP1: $1.1 \times \text{risk}$ · TP2: $1.5 \times \text{risk}$ · SL: $1.0 \times \text{risk}$
